### **FISCAL ANALYSIS**

#### **ASSUMPTION**

Officials from the **Department of Elementary and Secondary Education (DESE)** stated that currently DESE administers sixty plus professional development projects. Over 185 individuals are employed outside DESE in these projects. The local one percent is matched by the state's one percent to create regional professional development services to districts that otherwise wouldn't be served. Current programs that could be affected if funding is not appropriated include:

- 1) Missouri School Improvement Program (MSIP) - Data management contract through the Office of Social Economic Data Analysis (OSEDA), which drives DESE K-12 accreditation process.
- 2) Missouri Standards for Teacher Education Programs (MOSTEP) - Professional development which trains and supports examiners who accredit the sixty-five higher education institutions.
- 3) More Net - Technology training and development for the K-12 educational community.
- 4) Missouri Assessment Project (MAP) - Training and development of regional MAP facilitators.

ASSUMPTION (continued)

5) Transition To Teaching - A federal match program which provides individuals with the opportunity to become teachers as an alternative career.

6) Regional Professional Development Centers (RPDCs) - DESE provides nine Regional Professional Development Centers.

Additionally, DESE could lose federal funding from No Child Left Behind due to the inability to be in compliance with federal regulations.

**Oversight** assumes there could be savings to General Revenue if funding for every current program is not appropriated; however, there could be a loss in federal funding if certain programs are not funded through the appropriation process. Local school districts could see a loss of funding for services, but would realize a savings in not providing matching funds for programs. The net effect, fiscally, would be zero to local school districts.

FISCAL IMPACT - Small Business

Small businesses providing professional development services to school districts could be fiscally impacted as a result of this proposal.

DESCRIPTION

Currently, ninety percent of one percent of foundation formula money is distributed by the Commissioner of Education to address statewide areas of critical need for learning and development. This proposal would remove the aforementioned earmark and instead require that each year the Department of Elementary and Secondary Education (DESE) request funds for such purpose.

Further, this proposal removes the current requirement which directs ten percent of one percent of foundation formula money to grant awards by the state board of education for the "Success Leads to Success" grant program.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
